Summary

Analytical and results-driven Data Analyst with 4+ years of experience transforming complex datasets into actionable insights that drive business decisions across operations, finance, marketing, and customer experience. Proficient in SQL, Python, Power BI, Tableau, and Excel for building reports, automating workflows, and visualizing trends. Skilled in data modeling, data cleaning, dashboard creation, and stakeholder collaboration. Experienced in cloud platforms (GCP, AWS), relational databases, and Agile environments. Passionate about using data to improve efficiency, reduce risk, and create business value.

Education

University of North Carolina at Charlotte

Aug 2023 – Dec 2024

Master of Science in Information Technology - GPA (4.0/4.0)

Charlotte, North Carolina

Coursework: Cloud Computing for Data Analysis, Network-Application Development, Applied Databases, Database Systems

Technical Skills

Programming: Python (Pandas, NumPy, Scikit-learn, Matplotlib), SQL (PostgreSQL, MySQL, SQL Server), R (basic), Power Query

Dashboards & Reporting: Power BI, Tableau, Looker, Microsoft Power Platform (Automate, Apps), Microsoft Excel

Cloud & Infrastructure: Google Cloud Platform (BigQuery, Cloud Functions), AWS (S3, Redshift), Azure (Databricks, Power Platform)

AI/ML & Analysis Tools: Jupyter, Scikit-learn, Google Analytics, A/B Testing, Regression Analysis, Feature Engineering

ETL & Data Engineering: Apache Airflow (basic), dbt (basic), ETL pipelines, data cleansing, BigQuery, Microsoft Fabric (basic)

Development & Collaboration: Git, Jira, Confluence, Agile/Scrum, Business Requirements Gathering

Work Experience

Akdene Technologies

Feb 2025 – Present

Data Analyst Intern

Morrisville, USA

- Designed and implemented end-to-end dashboards in Power BI and Excel, integrating data from CRM, marketing, and operational sources to visualize key metrics such as revenue trends, customer retention, and campaign performance for executive leadership.
- Developed complex SQL queries to join, filter, and aggregate multi-source datasets, enabling faster ad hoc insights and eliminating manual reporting across business units.
- Automated reporting workflows using Python and BigQuery, reducing the time taken for weekly analytics deliverables from 4 hours to under 30 minutes.
- Worked closely with product and marketing teams to define performance indicators, validate data definitions, and translate evolving business questions into actionable data stories.

Accenture

Sep 2021 - Jul 2023

Application Development Associate (Data Analyst Role)

Hyderabad, India

- Created and maintained 30+ Power BI dashboards across finance, operations, and procurement teams, empowering stakeholders with real-time access to KPIs, forecast tracking, and spend analysis.
- Conducted deep-dive analyses on historical and live data to uncover operational inefficiencies, incorrect classifications, and usage spikes—leading to a \$250K cost-saving recommendation.
- Built reusable Python scripts to automate routine reporting, data transformations, and month-end processes, reducing manual work by over 120 analyst hours per month.
- Optimized complex SQL queries and stored procedures for large datasets in PostgreSQL and Redshift, increasing report speed and reliability for daily dashboards.
- Led A/B testing analysis across digital marketing and product engagement use cases, including click-through rates and retention metrics, helping the business improve conversion by 18%.
- Interfaced with cross-functional teams to gather reporting requirements, build user stories in JIRA, and ensure analytics were aligned with business objectives and KPIs.
- Trained junior analysts and business users on Power BI usage, dashboard best practices, and maintaining data consistency across self-service platforms.

EApps Technologies

Jan 2020 – Sep 2021

Data Analyst

Hyderabad, India

- Built Excel-based dashboards and reporting templates to monitor academic engagement, course success rates, and department performance, improving visibility for institutional leaders.
- Created automated ETL workflows in Python and BigQuery to clean and process student and financial data, improving reporting frequency from monthly to daily.
- Developed predictive models using Scikit-learn to identify high-risk student cohorts based on demographics, grades, and attendance patterns, supporting early intervention programs.
- Analyzed survey results and member feedback loops, translating sentiment and satisfaction trends into actionable service and curriculum improvements.
- Conducted data audits and integrity checks on enrollment and payment data to ensure accurate reporting and compliance during accreditation reviews.
- Documented reporting processes and created dashboard user manuals, helping standardize analytics operations and reduce onboarding time for new team members.
